

INDRAGITH N S

Full Stack Developer (.NET | React)

nsindragith@gmail.com | +91-9747770467 | [linkedin.com/in/nsindragith](https://www.linkedin.com/in/nsindragith) | github.com/Indragith-dev | portfolio-indran.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience designing and developing scalable enterprise web applications using React.js, TypeScript, JavaScript, ASP.NET, C#, and SQL. Experienced owning projects end-to-end from requirements through development, testing, deployment, and post-release changes. Skilled in building responsive frontend interfaces and robust backend APIs for high-performance business applications. Experienced in RESTful API development, database design, and performance optimization. Familiar with AWS deployment, Docker containerization, and CI/CD pipelines. Recognized for delivering production-ready software and collaborating effectively within Agile/Scrum teams.

TECHNICAL SKILLS

- Frontend: React.js, TypeScript, JavaScript
- Backend: ASP.NET, .NET, C#
- Database: SQL Server, MySQL
- Web Technologies: HTML5, CSS3, RESTful APIs
- State Management: Redux Toolkit
- Cloud & DevOps: AWS (EC2, S3, Nginx), Docker, CI/CD Pipelines, GitHub Actions
- AI-Augmented Dev: Claude (Sonnet, Opus), MCP Servers, Agentic Workflows, GitHub Copilot
- Methodology: Agile / Scrum
- Tools: Git, GitHub, Bitbucket
- Other: Performance Optimization, Responsive Design

PROFESSIONAL EXPERIENCE

Full Stack Developer | MAV-S Innovations Nov 2023 - Present

Trivandrum, Kerala

- Owned select projects end-to-end - gathering requirements, developing, testing, deploying, and handling post-release client changes
- Built and shipped enterprise-grade modules end-to-end, from React.js/TypeScript frontends to ASP.NET/C# backend services and SQL data layers
- Designed and implemented RESTful APIs using ASP.NET and C# to support business modules, improving average response times by approximately 20%
- Implemented performance optimizations including lazy loading, code splitting, and Redux Toolkit state management, cutting initial load time by approximately 25%
- Deployed applications on AWS (EC2, S3) using Nginx as a reverse proxy; containerized services with Docker for consistent, faster environment setup
- Maintained CI/CD pipelines using Bitbucket Pipelines to automate builds, testing, and deployments, reducing release turnaround by approximately 30%
- Collaborated with cross-functional teams of backend developers, QA engineers, and product managers following Agile/Scrum methodologies

Full Stack Developer Intern | KodNest Feb 2023 - July 2023

Bangalore, Karnataka

- Developed full stack features end-to-end using React.js, integrating them with backend services during a hands-on internship program
- Built responsive web applications and connected them to backend services via well-structured API contracts

Junior Frontend Developer | K2web Solutions Pvt Ltd Sep 2021 - Jan 2023

Kochi, Kerala

- Developed responsive web applications using HTML5, CSS3, JavaScript, and React.js for client projects

- Translated UI/UX designs into functional interfaces, ensuring cross-browser compatibility
- Built dynamic single-page applications for business platforms
- Applied Figma design mockups to prototype and implement UI elements, improving design-to-development handoff accuracy

KEY PROJECTS

Document Management System (DMS)

React.js, TypeScript, ASP.NET Core, SQL Server, SharePoint (SPFx)

- Built a full stack enterprise DMS: a React Vendor Portal (JWT auth) plus an internal SharePoint portal driving multi-stage document review and approval workflows
- Designed the backend API using Clean Architecture (ASP.NET Core, EF Core, SQL Server) with SharePoint integration via PnP and Hangfire background jobs
- Traveled to a client site in Abu Dhabi, UAE to independently set up and deploy the DMS platform on an air-gapped (isolated, no-internet) on-premise server, handling the full server configuration and deployment in person

Integrated Strategy & Operations Platform (ISOP)

.NET 9, PostgreSQL, EF Core, Wolverine, RabbitMQ

- Led backend development of a multi-tenant modular monolith, unifying strategic planning, project management, and task management into a single platform
- Owned the Project Management module (meetings, phases, risks, issues, vendors) and built major parts of Task Management (workspaces, dashboards, tasks) using CQRS and Wolverine/RabbitMQ event-driven messaging

AXIOM

.NET, React.js, PostgreSQL

- Independently built a subscription-based platform with a modular monolith backend, showcasing the company's product suite (ISOP, MyHR, and others)
- Implemented SSO sign-in and tenant-based setup for multi-product access

GRN - Invoice Management System

.NET, React.js, PostgreSQL, Clean Architecture

- Independently built a system to pull invoices from email, parse and analyze them, and cross-verify data against Oracle
- Implemented an approval workflow routing verified invoices through to payment

EDUCATION

Bachelor of Technology 2017 - 2021

College of Engineering Muttathara - CGPA: 7.73/10.0

Higher Secondary 2014 - 2016

SVRV NSS HSS, Vazhoor - CGPA: 9.49/10.0

CERTIFICATIONS

- Full Stack Development - KodNest (2024)
- Google Cloud Fundamentals - Coursera (2020)

ACHIEVEMENTS

- High Achiever Award - MAV-S Innovations (2025)
- IT Support Head - MAV-S Innovations

LEADERSHIP & ACTIVITIES

- Member - Technopark AWS Community
- Best Event Coordinator - Office Event Coordinator Head
- Skill Development Committee - Executive Member
